**BAXI Bermuda BBU HE**

## Frequently Asked Questions on The New High Efficiency Back Boilers

**Q. Who can install the new Baxi Bermuda back boiler?**

**A. [www.TheGasCompany.ie](http://www.TheGasCompany.ie) will install, and guarantee all work.**

**Q. How long does it take to install the back boiler and fire?**

**A. In our experience, the Baxi Bermuda BBU HE and fire front can both be installed within a single day. Your installer will be able to advise more specifically on timescales.**

**Q. How do I choose which fire front I want?**

**You can Contact us for a Free Brochure, or drop into our Showrooms to view the new Baxi Bermuda HE**

**Q. How do I control the back boiler unit?**

**A. Simple boiler controls are discreetly situated near the Fireplace. So while they are easy to reach, they won't detract from the stylish look of your fire.**

**Q. Can I get money off the new BBU via the Boiler Scrappage Scheme?**

**A. We run many Scrappage Scheme's on old Boilers throughout the year. Please contact us for details.**

**Q. Why install the new Baxi Bermuda if my old one still works?**

**A. The new Baxi Bermuda BBU HE is considerably more efficient than older versions - meaning less wasted energy and significantly lower heating bills. You could save up to a quarter from your Fuel Bill each year by switching to the higher efficiency model - and there's environmental benefits too.**

**Q. Can I use the new back boiler with my existing gas fire?**

**A. When the boiler is fitted, the open flue is replaced with the single piece concentric flue - so there is no way for the combustion gases to escape. As such, the Baxi Bermuda BBU HE can only be used in conjunction with a Valor Dimension electric fire.**
